

BOWL CUTTER KNIVES designed for pure performance

Bowl Cutter Knives offer an outstanding balance of high wear resistance, ductility (safety against cracks), corrosion resistance and a prolonged regrinding cycle.

YOUR ADDED VALUE

As a leader in tool steel production, we use our technical know-how to create high performance, premium solutions that are designed to increase your productivity.

Our bowl cutter knives are made of cross-rolled premium stainless knife steel, with tailored heat treatment for the right hardness level. Their excellent wear resistance, ductility (safety against cracks) and corrosion resistance result in longer production runs before resharpener and significantly increased throughput capacity.

The high toughness of our material means our knives are extremely resistant to both catastrophic failure and edge cracking, reducing the likelihood of breakage and subsequent downtime, helping you get maximum productivity from your equipment.

Our bowl cutter knives are available for all common brands of industrial bowl cutters, like Laska, GEA, Seydelmann, and many more.

CUSTOMER BENEFITS

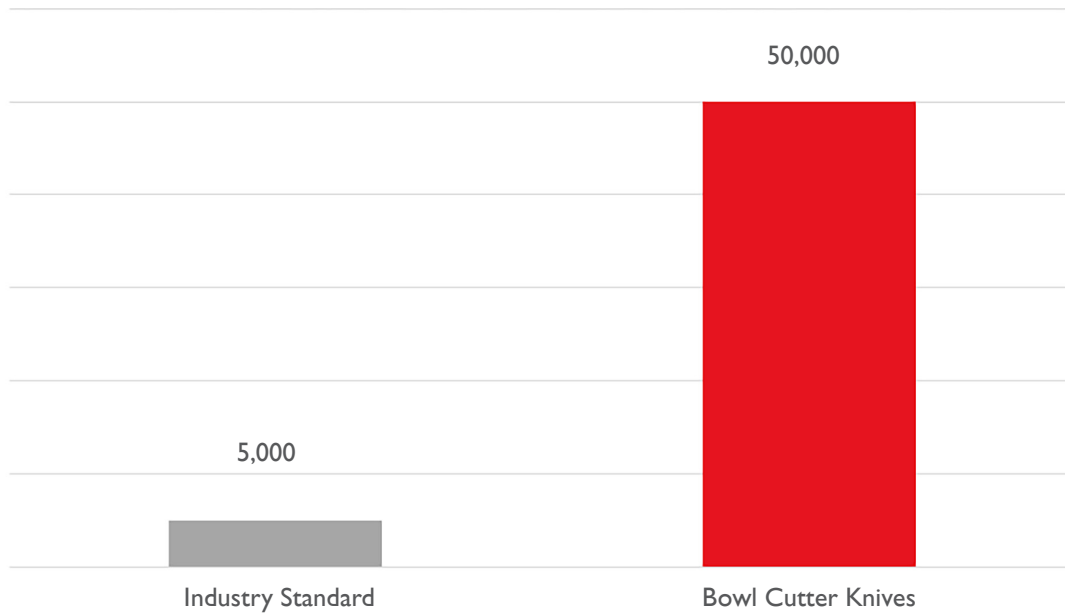

- » Get 10x more throughput before regrinding is needed
- » Higher machine availability and productivity
- » Significantly reduced total cost of ownership
- » Less maintenance effort
